Autodesk first announced plans to develop AutoCAD in 1981. It would first appear in beta form in May 1983 and then be introduced as a product in September 1983. It was originally written in Lisp with a graphic language that had elements of AutoLisp and Pascal, but it evolved into a proprietary and interpreted graphic language. Autodesk's first product was called AutoPAD (Automatic Protractor and Drawing), and it was a program that produced photolithographic prints. It was introduced in 1984. In 1986, Autodesk introduced AutoCAD for the Apple Macintosh. Autodesk delivered AutoCAD 4.0 in 1989. AutoCAD 4.0's graphics language was based on Macintosh 68000 assembly language, but some aspects of the assembly language were replaced by native compiled code. Autodesk was founded by Stephen Frankau and Lewis Freiberg. Freiberg was responsible for AutoLisp, and Frankau was responsible for the user interface. AutoCAD originally had a command line interface (CLI).

AutoCAD's original public release included only commands that could be found on the menu bar of the screen. The AutoCAD GUI is typically called a "mouse interface," which is the modern term for the CLI. Autodesk retained a significant role in the development of the AutoCAD product until December 2000, when the company was taken private and reorganized into two distinct companies, Autodesk and eDrawings. AutoCAD LT was a low-cost version of AutoCAD from 2008. It was bundled with AutoCAD 2007 and discontinued in 2014. History AutoCAD was developed by a team of 28 engineers and designers. In 1989 Autodesk released AutoCAD, an extension of the company's PAINT program. The design was created by Tom Stephens and assisted by Bill Pace. Their efforts led to the development of the first version of AutoCAD, later enhanced by Doug Seely. In 1992, Autodesk began development of a CAD application for microcomputers, called AutoCAD LT. AutoCAD LT allowed the use of graphics tablets, and reduced the price of AutoCAD by a factor of 30. The LT, or "low-cost" product, became widely popular and enabled the company to sell AutoCAD via a network of software distributors rather than through hardware resellers, eliminating the need for huge sales staffs. Autodesk continued to produce additional tools, as well as continued development on AutoCAD. In 1993, Autodesk released

Inventor for microcomputers, a 3D CAD package. In 1994, AutoCAD VSE 1.0 was released. In 1995, Inventor VE 1.0, was released. AutoCAD VE 2.0 was released in 1996. In 1997, AutoCAD VSE 2.0 and Inventor VE 2.0 were released. In 1998, the company released R14, adding the ability to import and export drawings from other applications, including Word and Excel, as well as to support two-way transformations. In 1999, AutoCAD 2000 was released. In 2001, the company released AutoCAD XP 3.0, with new features, including the ability to import and export drawings from any application. The year 2000 saw the release of Inventor XP 1.0, MicroStation 2.1 and AutoCAD XP 3.0. In 2002, Autodesk introduced Architectural Desktop, a Windows-based solution for 3D modeling and other design and drafting tasks. In 2003, AutoCAD XP 5.0 was released. In 2004, AutoCAD XP 7.0 was released. In 2005, AutoCAD XP 8.0 was released. In 2006, AutoCAD 2008 SP1 was released. In 2007, AutoCAD 2009 was released. In 2008, AutoCAD 2009 ca3bfb1094

Apoptosis and injury of the liver after endoscopic surgery in children. The rate of apoptosis, expression of the apoptosis-related protein bax, and hepatic function after endoscopic surgery in children were evaluated. A total of 18 children with choledochal cyst were treated endoscopically and followed up for at least 1 year after the surgery. The controls were 10 children who underwent endoscopic choledochotomy and exploration of the bile ducts. The rate of apoptosis, bax, serum glutamate oxaloacetate transaminase (SGOT), and serum glutamate pyruvate transaminase (SGPT) were examined in the livers of these children at intervals of 24, 72, and 120 hours and 1, 2, and 3 months after surgery. Results showed that the rates of apoptosis and bax expression were high in the liver tissue at 24 hours after endoscopic surgery. In the control group, apoptosis was low and bax expression was negative. The rate of apoptosis and bax expression in the group of children treated by endoscopic surgery were significantly higher than in the control group at 24 hours after the surgery (PFormer House speaker Newt Gingrich said that the issue of a Syrian attack is on the top of his list of issues that need to be dealt with when he meets with President-elect Donald Trump Donald John TrumpTrump says he doesn't think he could've done more to stop virus spread Conservative activist Lauren Witzke wins GOP Senate primary in Delaware Trump defends claim coronavirus will disappear, citing 'herd mentality' MORE.
