“Starting with Ultimate Team, and continuing with gameplay, we are committed to delivering a football game that not only provides options and is intuitive for users, but also delights our players,” said Tero Ojala, Executive Vice President, Marketing and Communications at 505 Games. “We are thrilled to now bring our revolutionary game engine to life in FIFA 22. Our team at UltraSF is committed to taking our game to the next level, and we are using FIFA 22 to push the boundaries and bring all our players in the game a completely new experience.” Tagging, Retagging, and Auto-Tag FIFA players will now be able to interact with the physics system and this integration means players will be able to earn points and retag balls more naturally within the game. A new auto-tag system is also included that will automatically tag players and their teammates automatically for users who prefer to tag their own players but the option to manually tag and retag will remain. Dribbling Changes In FIFA 18, players made dribbling moves by

---

pressing the analogue stick left and right in different directions. In FIFA 22, the analogue stick will now react to players' foot movement by mimicking the left or right-handed stick in game. Furthermore, in previous versions of the game, players could rush past their marker and gain possession of the ball when the marker had not captured the ball and started the transition. This will no longer be the case in FIFA 22. Instead, the player will be able to dribble through the marker and force the marker to change position and the ball will be awarded to them.

**Damage System** In previous FIFA games, the more you applied damage to your opponents, the harder they would become. However, in FIFA 22, the damage system has been redesigned to be more intuitive and there will be a balancing influence so players will have to be prepared to play through any new challenge. Players will still be able to use the damage system to gain a tactical advantage, but more stamina will also be required to be able to apply damage to opponents. All players will now have a stamina meter that changes colour depending on how much stamina they have available. If players are wearing jerseys with the damage penalty

system, they will take more damage than if they are playing a standard football game. Rivalry & Rivalry Builder This year's FIFA is committed to offering features that are not available in

Use your experience and passion for football to assemble a squad from your favourite players and take on your friends with FIFA Ultimate Team. Play long sessions of Football Manager-style gameplay with your friends. Create your ultimate team with pieces from over 600 of the world's best players and match them against your friends' FUT teams to see which club has the best collective talents. **PLAYER PROFILE** All you've heard is true: Alex Hunter is back! The ankle injury that has kept him out for almost a month is in the past, and the scoring hero for England at the World Cup is back and ready to play. **THUMBNAIL** This year Alex is a new and improved Alex Hunter, blazing past defenders in a stylish display of pace and skill, consistently finding goal-scoring pockets. He's not just a goalscorer, either, with a knack for reducing opposition defenders' star ratings, as well as doubling up as a free kick specialist thanks to his ability to find pockets of space on the ground. **WHEN IT COUNTS** Nobody loves to score goals like Alex Hunter. His pace and dribbling abilities allow him to pick up possession

---

almost anywhere, and it's in these moments that he can make a difference in a game. His improved shooting stats this year are proof that his ability as a scorer hasn't waned, even if he's more comfortable with finesse as the time-honoured Alex Hunter. **THE LOOK** We've given our agile striker a hairstyle to set him apart from the crowd: a three-toned short and medium crop that sees the longer locks at the back and sides. The overall look is sharper than usual – a change to match the nimble runner he has become. **STRENGTHS THREATS Weaknesses ASSESSMENT SUMMARY THUMBNAIL** The striker model we've created for Alex perfectly reflects his ability to pick out pockets of space and get shots away on the run. His most attractive feature, and the one that sets him apart from his peers, is the ability to dribble the ball at pace, finding windows of space behind defenders. **PLAYER PROFILE** Key figures from Alex's career are highlighted here. After almost two full campaigns with the English national side, the striker returns with one major target in
