Free Download Service Tool 3200 For Mp287winrar.Q: How to replace an element in a vector with the corresponding element in another vector? My question is very simple, but I am stuck on it for some time. Let us suppose I have two vectors x and y, and I want to replace element x[i] of vector x with y[i]. I tried both functions below but it doesn't seem to work. In particular, the first one returns "Error using elargchk (line 216) Error in get (line 4) list(list(x = seq(0, 24, by = 6), y = seq(0, 24, : arguments to be replaced: list(x = c(0, 6, 12, 18, 24), y = c(0, 6, 12, 18, 24))" and the second one gives: "Error in apply1(value, p$func, do.NULL,...) : invalid 'x' type" I hope I made myself clear and that someone can help me to solve this issue. Thanks in advance! A: Here's an option with base R: set.seed(1) x = as.integer(runif(100)) y = sample(20:25, size = 100, replace = TRUE) rep(x, y) # [1] 1 8 16 25 20 11 19 4 13 6 2 5 20 15 16 12 head(rep(x, y)) # [1] 1 8 16 25 20 11 19 4 13 6 2 5 20 15 16 12 However, what you describe is one way to do it using Vectorize: Vectorize(function(x, y) { rep(x, y) }, vectorize.args = 'x', vectorize.default = 'function(x, y) rep(x, y)' 6d1f23a050
